An update from A & A Environmental Consultants Inc.

We continue to monitor the COVID-19 pandemic carefully, and place the utmost importance on the safety of our staff and clients alike.

We are still open for business, and continue to serve clients of existing projects and take on new ones where possible. Projects that involve our staff entering homes and facilities will be examined on a case-by-case basis.

Our office is closed to clients at this time, but we can be reached by phone and email during business hours. Many of our staff are working from home where possible, but will be available during normal business hours via email or through their normal office extensions.

Although our doors are locked, we are still accepting samples for Asbestos Containing Materials testing. They should be double bagged, and can be dropped off in the mailbox at our office. Please include a business card or contact information where you can be reached to discuss details.

Our field technicians are taking steps to maintain the recommended social distancing guidelines, and they are paying vigorous attention to hygiene and sanitizing protocols.

Please don't hesitate to reach out if we can be of any assistance at this time.

A handwritten signature in black ink, appearing to be 'A. Rasoul', written in a cursive style.

Dr. Ali A. Rasoul, Ph.D., P. Geo., EP, QP
Principal Environmental Consultant
